## Objective

Independent, self-starting developer seeking to launch a career where I can utilize my skills to help the company create efficient, and responsive web applications. Experienced in working collaboratively with others to overcome challenges and working to achieve optimized results.

## Projects

### **Random Movie Generator**

#### ***Personal Project***

- Developed and designed a website which allows the user to access today's 20 most popular movies using the moviesDB API.
- The user can filter these movies by genre, ratings, or both in order to specify the type of movie they would see.

### **Notes App**

#### ***Personal Project***

- Developed a notes application using HTML/CSS/JavaScript, using localStorage to save a user's notes
- Users can delete individual notes, as well as edit a note of their choosing.
